

CIVIC ENGAGEMENT

In 2020, San Antonio’s citizens are deeply engaged as elected leaders, business leaders, volunteers, and voters in the process of making government more responsive and accountable to San Antonians. Vibrant grassroots movements, civic organizations, business leaders, city staff, and selfless citizens actively and effectively collaborate in all areas of city operations and governance. Elected officials and city staff take ownership of issues and are accountable for results. City, county and state branches of government coordinate their work to eliminate waste brought about by duplication of effort. The city cultivates inspired and effective leaders in selfless service to the community and is recognized for delivering transparency in government.
